PT. RAHAYU CARITA PERKASA

OUR **MISSION**

As a resourceful company, PT Rahayu Carita Perkasa aspires to become one of the leading regional Oilfield suppliers providing cost effective solutions to our valued customers satisfaction. We directly serve the endusers by offering our exceptional supply and service.

Lina Tjhan

MESSAGE FROM THE CEO

PT. Rahayu Carita Perkasa (RCP) has served the nation for more than 15 years now. We are specializes in the service, repair, refurbishment, and up grading of lifeboat on ships, rigs and offshore oil & gas platforms.

As our contribution to the nation, we currently train local people to be the prominent engineer, replacing expatriate. This is our commitment as we are continuously increasing our local content.

We are upgrading our quality management, focusing to the safety, health and environment by applying ISO certifications, and good corporate governance, to support our service to customers.

As we grow, we open workshops in the main ports in Indonesia to be able to serve more and more ships all over Indonesia. We hire local people to develop their competencies; furthermore, it will also increase the local revenues.

And all of our endeavors have been resulted in an endorsement from the Ministry of Transportation. RCP is the first company who got the endorsement under the term of type approval from the Directorate General of Sea Transportation, Ministry of Transportation.

However, this achievement is not our final goal, we are still striving for excellence and focus to ensure total customer satisfaction, because we believe that we cannot grow without our loyal customers.

ABOUT **US**

PT RAHAYU CARITA PERKASA was established on February 24th, 1999. The company started as a general supplier for all types of equipments, tools, software solutions and maintenance services to support oil and gas industry of Indonesia.

The following goods are part of our product portfolio we supply to our local and international clients: pumps, compressors, pipe fittings, valves, fall cables, IT products & software applications, stud bolts and nuts, safety products, lifeboats and davit system.

Covering different project categories, six independent legal entities are registered at major oil and gas companies in Indonesia.

During the years of operation, the company has permanently expanded her market penetration. Business relation with global players, such as Conoco Philips Indonesia, Exxon Mobil, Chevron, and etc. illustrates the company's excellent reputation.

PT RAHAYU CARITA PERKASA is a diversified Oilfield supply company providing a complete range of equipments, parts, accessories and services for Oil and Gas related projects. We provide professional and dedicated services to Oil and Gas industry.

PT RAHAYU CARITA PERKASA is a sole exclusive agent for Survitec Survival Craft and Turboperf LLC.

PT RAHAYU CARITA PERKASA is a well-resourced company, striving for excellence and total customer satisfaction. We directly serve the end-users by offering our exceptional supply and service.

 ENSCO

[Your Safety Partner]

Our 15,000 sq feet covered service centre provide full facilities for rehooking in accordance with IMO MSC. 1392, fibreglass repair, spray painting winch service and 110% load dynamic testing and hook operational test.

We also carry a good range of spares and consumables for the various brands of lifeboat for off-the-self delivery.

Our service engineers can also travel to locations to attend to your service requirement such as annual and five yearly service in accordance with IMO MSC.1206.

OUR SERVICES

Lifeboat, Rescue Boat wih Davit and Winch

PT RCP is a local company that specialises in the service, repair, refurbishment and up grading of lifeboats on ships,rigs and offshore oil and gas platforms

We also provide a few lifeboats for rental for situation when your lifeboats need to be sent for repair or rehooking.

PT RCP has also affiliated service companies with qualified service engineers in the Asean region should you require services of Indonesia

Turbo Machinery Management System

Training Program

Training programs are essential to ensure clients extract the maximum value from Turboperf technologies. Training programs available to clients are summarized below:

- TMMS Program Management Training
 - TMMS Process Training
 - TMMS Awareness
 - Match Model Optimizer Training
 - Combustion Performance Optimizer Training
- satisfaction. We directly serve the endusers by offering our exceptional supply and service.

TMMS Surveillance & Model Update

Often Oil/Gas Operations do not have the local resources to manage the periodic model updates of the TMMS™, interpret the results of the daily TMMS™ analysis, and make recommendations to the Operation leaders. If this is your situation, then the Surveillance & Model Updates Service may fit your operation's needs.

Turboperf provides the following services for each turbomachinery unit that we are contracted to monitor:

- Periodic Update of all performance models
- Periodic Program Calibration
- Daily Review of turbomachinery Performance Opportunities & Alarms
- Daily generation of Recommendations to maximize capacities & reliability
- Periodic Reports to summarize Performance & Reliability

Match Model Optimizer

If you are currently using the OPMMSTM software, and Turboperf has access to your TMMSTM performance data, we can perform an analysis of your GG Engine fleet and make recommendations for engine swaps that will eliminate output constraints resulting from poor GG Engine versus Power Turbine matches.

In addition, if the client has several spare Avon engines to choose from, we can evaluate the best spare engine match up for the Power Turbine.

Combustion Performance Optimizer

Achieving Balanced Combustion is essential to maximizing expensive turbine blade life, through reduction in Thermal Cycle Stress, yet it has proved elusive for many operators of Gas Turbines.

Turboperf has developed a program which models the combustion performance and provides a process to improve concentric combustion balance.

Users of this technology have experienced blade life increases of 100% and have witnessed significant reduction in gas turbines fleet fired hour costs.

OUR PRODUCTS

We have experienced over the years in oil and gas operation to supply wide range type of spare parts that meet to our customer needs and requirements. Following is the products that we have been supplied:

- Industrial, Oilfield and Safety Equipment
- Oilfield, Industrial Valves and Actuators
- Actuation
- Pipe fittings and flanges.
